PROFILE

Computer Science undergraduate and game developer with hands-on experience building games across **Unreal Engine 5, Unity, and Python (Pygame)**. Skilled in **gameplay mechanics, C++, C#, level design, 3D asset creation in Blender, and performance optimization**. Passionate about crafting immersive player experiences from concept to playable build.

TECHNICAL SKILLS

- **Game Engines:** Unreal Engine 5, Unity
- **Programming:** C++, C#, Python
- **3D & Art:** Blender (3D Modeling, Asset Creation, Rendering)
- **Gameplay Systems:** Mechanics Design, Level Design, Scoring Systems, AI NPCs
- **Other:** Ray Casting, Physics Simulation, Sound Integration, Git
- **Additional:** React, Node.js, Python (cross-domain development experience)

GAME PROJECTS

- **Bullseye Challenge** – *High-Graphic 3D Sniper Shooter* **Completed**
Tech: Unreal Engine 5, Blender, C++  Demo
 - Developed a high-fidelity 3D sniper shooting game with timed target mechanics, custom-built environments, and scoring system using Unreal Engine 5.
 - Created original 3D assets and environments in Blender and integrated them into Unreal, optimizing for smooth real-time rendering performance.
 - Implemented complete shooting mechanics including sniper aiming, bullet physics, target hit detection, and level timing system.
- **Astroverse** – *Cultural 3D Educational Game* **In Development**
Tech: Unreal Engine 5, Blender, C++  Demo
 - Designing an immersive cultural educational game with interactive storytelling, NPC interactions, and richly detailed 3D environments.
 - Modeled detailed 3D assets in Blender and optimized rendering pipeline for consistent real-time gameplay performance.
- **Doom Game** – *First-Person Raycasting Game* **Completed**
Tech: Python, Pygame  GitHub —  Demo
 - Built a Doom-inspired first-person game from scratch using raycasting techniques and Pygame, implementing NPC behavior, collision detection, and game loop logic.
 - Demonstrates low-level understanding of 3D rendering principles without a game engine.
- **Jackpot** – *Slot Machine Game* **Completed**
Tech: Unity, C#  GitHub —  Demo
 - Developed a slot machine game in Unity with engaging visuals, sound effects, and smooth UI animations using C#.
 - Demonstrates cross-engine adaptability having built games across Unreal Engine 5, Unity, and Python.

EDUCATION

- **GLBITM, Greater Noida** 2023 – 2027
B.Tech - Computer Science and Engineering

ACHIEVEMENTS & COMPETITIONS

- **Finalist** – NIDAR Drone Competition (National-level, DFI & MeitY, Govt. of India)
- **Finalist** (College Level) – Smart India Hackathon (SIH)
- **Advanced to Phase 3** – Guidewire Hackathon
- **Participant** – HackFest, Zoho SaleIQ Chatbot Challenge
