SUMMARY

Final-year Computer Science undergraduate with hands-on experience in full-stack development, AI systems, mobile applications, and IoT. Passionate about building real-world products — from AI-powered platforms to autonomous systems — and currently gaining industry experience as an Android App Developer Intern at Greenverse Pvt. Ltd.

EXPERIENCE

- **Android App Developer Intern** June 2026 – Present
Greenverse Pvt. Ltd. Tech: React Native, AWS IoT Core
 - Developing a cross-platform mobile application for Greenverse’s smart air purifier product using React Native.
 - Integrating AWS IoT Core for real-time device communication between the mobile app and air purifier hardware.

PROJECTS

- **GigShield AI** – AI-Powered Insurance for Gig Workers 🐙 GitHub
Tech: React, Node.js, Express, MongoDB Atlas, FastAPI, Python, OpenWeather API, Razorpay
 - Built a full-stack AI insurance platform for delivery workers that auto-detects 4+ real-time risk conditions (rain, heat, pollution, natural disasters) via OpenWeather API and files claims instantly.
 - Integrated Razorpay sandbox for automated payouts and implemented an AI vitality score engine using Node.js cron jobs to assess worker eligibility in real time.
- **Smart Traffic Management System** 🐙 GitHub
Tech: React, TypeScript, Supabase, YOLOv5, OpenCV, SUMO
 - Architected an AI-based traffic management system using YOLOv5 for real-time vehicle detection and congestion analysis across up to 4 simulated intersections via SUMO.
 - Designed adaptive signal control logic supporting both AI-driven automation and manual override modes.
- **CodeVault** – LeetCode to GitHub Browser Extension 🐙 GitHub
Tech: JavaScript, HTML, CSS (Chrome Extension)
 - Developed a Chrome extension that automatically detects solved LeetCode problems and pushes solutions to GitHub, organized by difficulty and category; personally used to sync 70+ solutions.
 - Implemented GitHub Personal Access Token authentication via a clean popup UI, with progress tracking showing total problems pushed.
- **Drone Disaster Relief System** 🐙 GitHub
Tech: Python, OpenCV, ROS, IoT
 - Developed a fully autonomous dual-drone system for disaster response; successfully tested in a college campus environment, detecting humans via computer vision and navigating without manual intervention.
 - Selected as **National-level Finalist** in the NIDAR Drone Competition (DFI & MeitY, Govt. of India).

TECHNICAL SKILLS

- **Languages:** C, C++, Java, Python, JavaScript, TypeScript
- **Frontend & Mobile:** HTML, CSS, React, React Native
- **Backend & Databases:** Node.js, Express.js, MongoDB, SQL, Supabase, Firebase
- **Tools & Technologies:** Git, AWS IoT Core, OpenCV, YOLOv5, ROS
- **Core Concepts:** Data Structures & Algorithms, OOPs, DBMS, Computer Networks

CERTIFICATIONS

- **CCNA – Cisco Certified Network Associate** Cisco Networking Academy
- **Cybersecurity & Python Programming (PCEP Level 1 & Level 2)** Cisco Networking Academy
- **MongoDB Developer Certification** MongoDB University

EDUCATION

- **GLBITM, Greater Noida** 2023 – 2027
B.Tech – Computer Science and Engineering
