EDUCATION

- **GLBITM, Greater Noida** 2023 – 2027
Bachelor of Technology (B.Tech) – Computer Science and Engineering

EXPERIENCE

- **Software Development Intern** June 2026 – Present
Greenverse Private Limited, Noida *Tech: React Native, AWS IoT Core, MQTT, AWS Lambda, DynamoDB, REST API*
 - Building a cross-platform mobile app using React Native for Greenverse's smart air purifier, implementing live device dashboards, Wi-Fi/BLE onboarding flows, and offline state management.
 - Architecting hardware-to-cloud data pipeline using AWS IoT Core (MQTT) for real-time telemetry, AWS Lambda for serverless data processing, and DynamoDB for cloud storage.
 - Implementing secure device-cloud communication using JWT authentication and REST APIs; testing and validating all endpoints via Postman and AWS CloudWatch.

PROJECTS

- **GigShield AI** – AI-Powered Insurance for Gig Workers 🐙 GitHub
Tech: React, Node.js, Express, MongoDB Atlas, FastAPI, Python, OpenWeather API, Razorpay, REST API, JWT
 - Built a full-stack AI insurance platform for delivery workers that auto-detects 4+ real-time risk conditions (rain, heat, pollution, natural disasters) via REST APIs and files claims instantly.
 - Integrated Razorpay sandbox for automated payouts; secured all endpoints with JWT authentication and implemented an AI vitality score engine using Node.js cron jobs to assess worker eligibility in real time.
- **Smart Traffic Management System** 🐙 GitHub
Tech: React, TypeScript, Supabase, YOLOv5, OpenCV, SUMO
 - Architected an AI-based traffic management system using YOLOv5 for real-time vehicle detection and congestion analysis across up to 4 simulated intersections via SUMO.
 - Designed adaptive signal control logic supporting both AI-driven automation and manual override modes; managed codebase using Git with clean branching strategies.
- **CodeVault** – LeetCode to GitHub Browser Extension 🐙 GitHub
Tech: JavaScript, HTML, CSS (Chrome Extension)
 - Developed a Chrome extension that automatically detects solved LeetCode problems and pushes solutions to GitHub, organized by difficulty and category; personally used to sync 70+ solutions.
 - Implemented GitHub Personal Access Token authentication via a clean popup UI, with progress tracking showing total problems pushed.
- **Drone Disaster Relief System** 🐙 GitHub
Tech: Python, OpenCV, ROS, IoT
 - Developed a fully autonomous dual-drone system for disaster response with an end-to-end computer vision pipeline for real-time human detection; successfully tested on college campus without manual intervention.
 - Selected as **National-level Finalist** in the NIDAR Drone Competition (DFI & MeitY, Govt. of India).

TECHNICAL SKILLS

- **Languages:** C, C++, Java, Python, JavaScript, TypeScript
- **Frontend & Mobile:** HTML, CSS, React, React Native
- **Backend & Databases:** Node.js, Express.js, MongoDB, SQL, Supabase, Firebase, DynamoDB
- **Cloud & IoT:** AWS IoT Core, AWS Lambda, MQTT
- **Tools & Technologies:** Git, REST API, JWT, Postman, Swagger, OpenCV, YOLOv5, ROS
- **Core Concepts:** Data Structures & Algorithms, OOPs, DBMS, Computer Networks

CERTIFICATIONS

- **CCNA – Cisco Certified Network Associate** *Cisco Networking Academy*
- **Cybersecurity & Python Programming (PCEP Level 1 & Level 2)** *Cisco Networking Academy*
- **MongoDB Developer Certification** *MongoDB University*

ACHIEVEMENTS

- **National-level Finalist** – NIDAR Drone Competition (DFI & MeitY, Govt. of India)
- **1000+ GitHub Contributions** across open-source and personal projects
- **300+ DSA Problems** solved
- **Finalist** (College Level) – Smart India Hackathon (SIH)
- **Advanced to Phase 3** – Guidewire Hackathon
